

# COSC 3337 Checkpoint 2: Database Design

[Application Name]

[Member 1, Member 2, Member 3, Member 4]

## 1 ER Diagram

[Insert ER diagram image here]

### Requirements check

| Requirement                                       | Where it appears in the diagram                               |
|---------------------------------------------------|---------------------------------------------------------------|
| At least 6 entity sets                            | [List them]                                                   |
| At least one many-to-many relationship set        | [Relationship name and the entities it connects]              |
| At least one weak entity set                      | [Weak entity, its identifying relationship, and owner entity] |
| Cardinality & participation on every relationship | [Yes / notes]                                                 |

## 2 Relational Schema

- [TABLE]([id], [attribute], [attribute], [*other\_id*]<sup>FK</sup>)  
[*other\_id*]<sup>FK</sup> references [OTHERTABLE]
- [TABLE]([id], [attribute], [attribute])
- [TABLE]([id], [attribute], [attribute])

### How we translated the ER diagram

- **Weak entity:** [How the weak entity became a table, and what its primary key is]
- **Many-to-many relationship:** [The table you created for it, its primary key, and its foreign keys]

### 3 Updated Questions

| #  | Question   | Changed?   |
|----|------------|------------|
| 1  | [Question] | [No / how] |
| 2  | [Question] |            |
| 3  | [Question] |            |
| 4  | [Question] |            |
| 5  | [Question] |            |
| 6  | [Question] |            |
| 7  | [Question] |            |
| 8  | [Question] |            |
| 9  | [Question] |            |
| 10 | [Question] |            |
