COSC 3337 Final Project Report

[Member 1, Member 2, Member 3, Member 4]

Repository: [https://github.com/\[user\]/\[repo\]](https://github.com/[user]/[repo])

1 Overview

[Two or three paragraphs.]

2 Database Design

2.1 Final ER diagram

[Insert final ER diagram]

2.2 Final relational schema

- [TABLE]([id], [attribute], [other_id]^{FK})
- [TABLE]([id], [attribute], [attribute])

2.3 Changes since Checkpoint 2

- [Change]: [Why you made it]

3 Query Map

#	Question it answers	Screen and user action	SQL features
Q1	[Plain-English question]	[e.g., “My Listings” page, click “Show unsold”]	[Outer join]
Q2	[Question]	[Screen / action]	[GROUP BY + HAVING]
Q3	[Question]	[Screen / action]	[Subquery]
Q4	[Question]	[Screen / action]	[Set operation]
Q5	[Question]	[Screen / action]	[]
Q6	[Question]	[Screen / action]	[]
Q7	[Question]	[Screen / action]	[]
Q8	[Question]	[Screen / action]	[]

4 View(s)

- [view_name]: [What it does]. Used by [screen / feature].

5 Screenshots

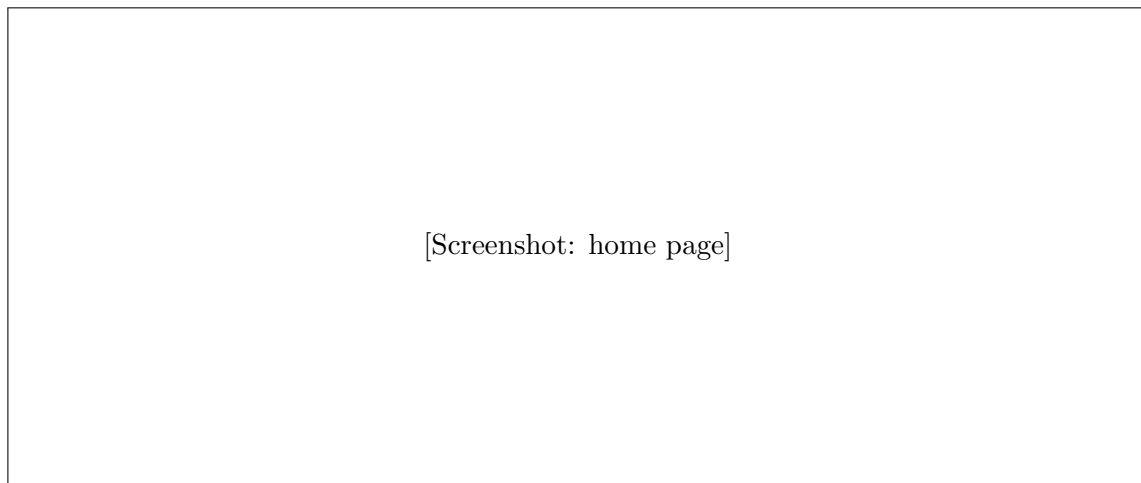

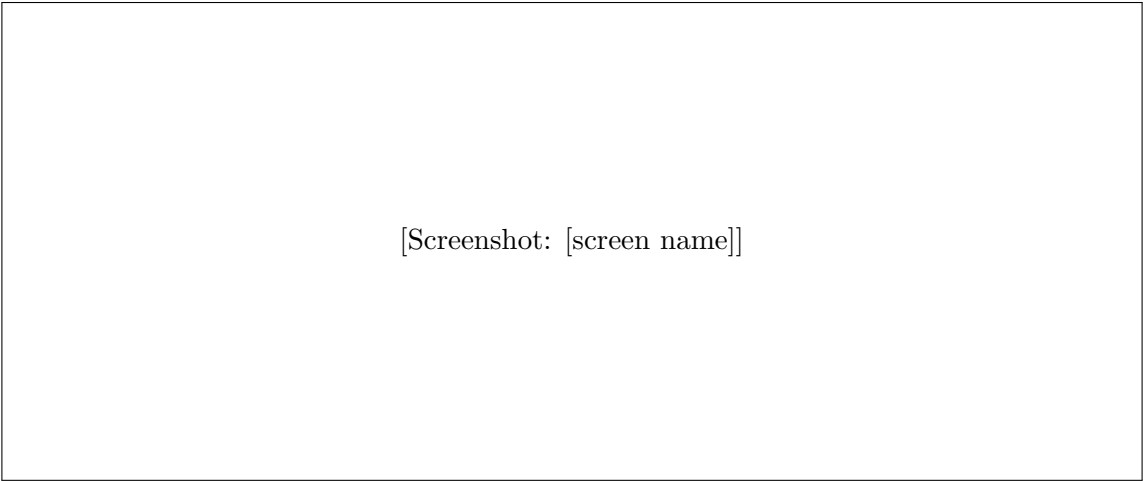

Figure 1: [What this screen shows and which queries it runs.]

6 Team Contributions

Member	Contributions
[Name]	[What they did]
[Name]	[What they did]
[Name]	[What they did]
[Name]	[What they did]

Figure 2: [Caption]

7 Setup Instructions

1. **Requirements:** [e.g., Python 3.12, MySQL 8]
2. **Create the database:** [command, e.g., `mysql -u root -p < schema.sql`]
3. **Load the data:** [command, e.g., `python load_data.py`]
4. **Configure the connection:** [where credentials go, e.g., a `.env` file; never commit real passwords]
5. **Run the application:** [command and the URL to open]

Extra Credit: Deployed Application (optional)

Live application: [\[https://...\]](https://...)

Hosted on: [service]

Sources and Tools

- **Data:** [Dataset name, URL, license]
- **Libraries and frameworks:** [Names and versions]
- **AI tool use:** [Which tools, and what you used them for; or “None”]

A SQL for Required Queries

Q1: [Short description]

```
-- Answers: [plain-English question]
SELECT s.name, i.title
FROM seller s
LEFT JOIN item i ON i.seller_id = s.seller_id
WHERE s.seller_id = ?;
```

Q2: [Short description]

```
-- [SQL]
```

B View Definitions

```
CREATE VIEW [view_name] AS
SELECT ...;
```
